

- Restores essential electrolytes to endurance horses
- Reduces the risk of metabolic disorders
- Provides supplemental calcium and magnesium
- Contains minimal sugar content, unlike other electrolytes
- Paste contains buffering agents

P.O. Box 1013, Versailles, KY 40383

ENDURA-MAX™

Endura-Max is an electrolyte supplement designed specifically for endurance horses. Because electrolyte balance is critical for maximal performance, replacement of lost electrolytes is imperative. Endura-Max is formulated to restore key electrolytes relinquished in sweat, including sodium, chloride, and potassium. Unlike other electrolytes, Endura-Max also contains calcium and magnesium, minerals that may be depleted in levels high enough to elicit metabolic disorders such as thumps and tying-up in horses subjected to exercise of low intensity and long duration.

Feeding Instructions:

The degree of electrolyte supplementation will depend on the level of exercise and environmental conditions.

Ingredients:

Sodium chloride, potassium chloride, dextrose, calcium acetate, calcium carbonate, magnesium oxide, and natural flavors.

Guaranteed Analysis (per ounce):

Sodium (min.)	5,528 mg
Chloride (min.)	11,886 mg
Potassium (min.)	3,657 mg
Calcium (min.)	754 mg
Magnesium (min.)	153 mg

Available Sizes:

5-lb and 40-lb containers

ENDURA-MAX PLUS™

Endura-Max Plus is a buffered oral electrolyte paste. It offers the same benefits of Endura-Max, as well as agents that coat the stomach lining and neutralize gastric acid, which promote digestive health and reduce the risk of gastric irritation.

Feeding Instructions:

For immediate oral supplementation or preloading prior to a competition, use one-half to one tube of Endura-Max Plus. During a competition, a horse should receive one tube at each vet check.

Ingredients:

Sodium chloride, potassium chloride, magnesium oxide, calcium carbonate, calcium acetate, dextrose, dihydroxyaluminum sodium carbonate (DASC), aluminum phosphate, and glycerin.

Guaranteed Analysis (per 60 cc):

Sodium (min.)	6,600 mg
Chloride (min.)	14,000 mg
Potassium (min.)	4,300 mg
Calcium (min.)	900 mg
Magnesium (min.)	180 mg

Available Size:

60cc tube
